The scoring for this project was composed of both the technical qualifications and the price for both engineering and the construction phases of the work. The Kokosing team scored the highest of the three teams based on the technical qualifications. The response included items above and beyond the scope of work that was included within the RFP documents, and those items are being included in the Contract Scope of Work, indicating a value add to their proposal. During negotiations, Kokosing also waived several of their exclusions without an adjustment in the price.

The proposed pricing provided by Kokosing was 2nd low of the three prices and was only 0.1% higher than the low price. The third bid was only 5.7% higher than the low bid. The bid table was reviewed for anomalies, and none were found. Due to the cost being scored as part of the evaluation criteria (40 points), the proximity of Kokosing to the lowest price, and the overall consistency in the pricing received between all three proposers, the evaluation team determined that negotiations were not required.

Provisionary Allowance is an amount included in the Contract Price to reimburse the Contractor for the cost to furnish and perform Work that is uncertain. Any remaining balance upon Final Completion shall be retained by the GLWA and not paid to the Contractor.

Benchmarking was completed by comparing the proposals for this project. This analysis confirmed that rates are in competitive range. The rate comparisons and allowances (if any) are illustrated in the attached cost tabulation.
